AUTHOR INDEX

SOVIET PHYSICS–ACOUSTICS
Volume 16, 1970
A translation of Akusticheskii Zhurnal

The bracketed page numbers refer to the Russian edition.

Alekseev, B. N. and D. B. Dianov, Directivity of Radiators Operating through Transmission Layers. (T) – 506 [597]
Aliev, S. S. and P. K. Khabibullaev. Acoustic Relaxation in Nitrobenzene–n-Hexane Solutions Having a Critical Stratification Point. (E) – 108 [137]
– L. E. Kvasova, L. V. Lanshina, K. Parpiev, and P. K. Khabibullaev. Ultra- and Hypersonic Properties of Some Organic Liquids. (E/T) – 250 [304]
– K. Parpiev, and P. K. Khabibullaev. Acoustic Relaxation in Liquid Ethylene Glycol and Diethylene Glycol. (E) – 387 [466]
Anan'eva, A. A., G. I. Gusakova, L. R. Zalonts, and A. V. Sosnov, A Lead Zirconate-Titanate (TsTS 13/1) Ceramic Spherical Hydrophone. (E) – 253 [306]
Arabadzhi, V. N. and E. S. Prokhorov. Reverberation of the Acoustic Signals of River Boats. (E) – 256 [309]
Arkhipova, A. D. and M. A. Sapozhkov. The Quality of Vocoder Speech. (R) – 292 [345]
Astapenko, V. M. and G. D. Malyuzhinets. Diffraction of a Plane Wave by a Partial Periodic Grating. (T) – 299 [354]
– The Additional Mass of Special Gratings. (T) – 389 [468]
Babkin, V. Book Review. Bird Song: Acoustics and Physiology. Crawford H. Greenewalt. (R) – 545 [629]
Balalaev, Yu. F. Investigation of Ultrasonic Fractures in Rods. (T/E) – 509 [599]
Barabanov, N. N. and L. G. Saichuk. Application of Statistical Experimental Design Techniques to Determine the Relation between the Velocity of Ultrasound and the Composition of a Multicomponent System. (E) – 436 [511]
Bardyshev, V. I., N. A. Vasil'ev, and S. G. Gershman. Investigation of the Coherence of a Continuous Sound Signal in the Sea. (E) – 392 [470]
– A. M. Velikanov, and S. G. Gershman. Experimental Studies of Underwater Noise in the Ocean. (E) – 9 [10]
Barkhatov, A. N., N. V. Gorskaya, and N. A. Kachkoeva. Moire Modeling of the Sound Field in a Wedge. (T/E) – 9 [10]
Baron, S. B. and A. A. Yanpol'skii. Analysis of the Frequency Dependence of the Sound Pressure in an Enclosure. (T) 163 [192]
Beloozerov, N. N. and I. I. Dolgova. Diffraction of a Cylindrical Wave by a Weakly-Reflecting Cylindrical Shell. (T) – 306 [364]
Belov, B. G. Effect of Ultrasound on Diffusion Processes in a Gel–Liquid System. (E) – 514 [603]
Belova, G. N. Ultrasonic Synchronization of Laser Emission. (E) – 110 [138]
Bibikov, N. G. Response Characteristics of Unit Neurons in the Auditory Center of the Midbrain of the Frog (Rana Ridibunda) to Tone Stimuli. (E) – 168 [199]
Bobylev, B. A. and A. F. Kravchenko. Absorption of Ultrasound in Semiconducting $A^{III}B^{V}$ Compounds. (E/T) – 13 [15]
Boguslavskii, Yu. Ya., A. I. Ioffe, and K. A. Naugol'nykh. (T) – 17 [20]
Bordelius, N. A. and V. K. Semenchenko. Absorption of Ultrasound by Certain Crystal Polymers in the Melting Region. (E) – 519 [608]
Brekhovskikh, L. M., V. V. Goncharov, and V. S. Gostev. Aspects of the Radiation of Sound by Waves on Curvilinear Boundaries. (T) – 21 [25]
Bruk-Levinson, É. T., V. B. Nemtsov, and L. A. Rott. Statistical Calculation of the Complex Bulk Elastic Modulus. (T/E) – 174 206
Burundukov, K. M. and A. M. Lobanov. Technique for the Precision Measurement of Ultrasonic Velocity Dispersion in Liquids. (E) – 259 [311]
Buturovich, I. Kh. and Khan Dyk Kim. Selection of the Parameters of Curvilinear Concentrators to Give a Predetermined Oscillation Frequency. (T/E) – 179 [213]
Bykov, V. P. and V. V. Elov. Acoustic Oscillations in an Ellipsoidal Cavity. (T) – 312 [372]
Chalov, A. V. Investigation of the Growth of a Gas Bubble in Water due to "Rectified" Diffusion in a Noise Field. (T) – 543 [627]
Dianov, D. B. and A. G. Kuz'menko. Analysis of a Cylindrical Piezoceramic Transducer in Radially Symmetric Modes. (T) – 34 [42]
– and A. G. Kuz'menko. Investigation of the Possibilities for Broadening the Transmission Band of Cylindrical Piezoelectric Ceramic Transducers. (T) – 197 [236]
– (See Alekseev, B. N.) – 506 [597]

SOVIET PHYSICS–ACOUSTICS
Volume 16, 1970
A translation of Akusticheskii Zhurnal

Articles are classified under the following categories:

Acoustic Signal Processing, Statistical and Information Theory, Pattern Recognition

Aeroacoustics, Macrosonics, Gross Movement of Matter by Sound, Acoustic Streaming, Shock Waves, Aerosol Coagulation

Architectural Acoustics
- Auditorium and Room Acoustics, Sound Systems
- Sound Absorption and Insulation: Theory, Measurement, and Materials

Bioacoustics, Medical Ultrasonics (see also Physiological and Psychological Acoustics)

Books, Bibliographies, and Reviews

General, Unclassified
- Biographical and Historical
- Events, Announcements

Instruments and Apparatus
- Measuring Instruments
- Transducers (see also Ultrasonics – Solids)

Mechanical Vibrations and Shock, Insulation, Seismology, Soils

Noise and Noise Control in Aircraft, Cities, Industry, and Transportation

Physiological and Psychological Acoustics; Ear and Hearing (see also Bioacoustics)

Radiation and Scattering
- Mathematical Wave Theory, Ray Acoustics
- Physical Effects of Sound (see also Ultrasonics–Solids)
- Physical Effects of Sound (see also Ultrasonics – Physical Effects)
- Radiation from Vibrating Objects in Air and Other Gases, Acoustic Impedance, Sources
- Reflection, Refraction, Diffraction, and Interference
- Velocity and Attenuation of Sound Waves
- Wave Propagation in Tubes
- Waves in Bounded Media, Normal Modes, Surface Modes

Special Topics in Acoustics, Unconventional Applications

Speech Communication (see also Acoustic Signal Processing)

Standards

Ultrasonics and Hypersonics
- Biological Effects (see also Bioacoustics)
- Chemical Effects
- Gases, Ultrasonic Velocity, Dispersion, Absorption (see also Radiation and Scattering, Aeroacoustics)
- Instruments
- Liquids, Ultrasonic Velocity, Dispersion, Absorption, Cavitation
- Physical Effects, Optical Diffraction, Ultrasonic Processing
- Relaxation Processes in Solids, Liquids, and Gases
- Solids, Ultrasonic Velocity, Dispersion, Absorption, Parametric Amplification, Transducer Materials, Focusing Systems

Underwater Sound (see also Ultrasonics – Liquids)
- Cavitation, Bubbles, Turbulence, Splashing
- Echo Ranging, Sonar, Propagation and Reverberation, Sound Channels, Measurements
- Ice: Under-Ice Acoustics, Icebergs, Ice Covers and Floes

ACOUSTIC SIGNAL PROCESSING, STATISTICAL AND INFORMATION THEORY, PATTERN RECOGNITION

Moiré Modeling of the Sound Field in a Wedge. (T/E) A. N. Barkhatov, N. V. Gorskaya, and N. A. Kachkhoeva – 9 [10]

On the Spectra of High-Intensity Noise. (T) V. P. Kuznetsov – 129 [155]

Analysis of the Frequency Dependence of the Sound Pressure in an Enclosure. (T) S. B. Baron and A. A. Yanpol'skii – 163 [192]

Second Relaxation Interval in Carboxylic Acids. (E/T) L. V. Lanshina, M. I. Lupina, and P. K. Khabibullaev – 343 [413]

Calculation of the Random Vibration Characteristics of a Panel in the Sound Field of an Exhaust Jet. (T/E) K. G. Valeev and V. E. Kvitka – 184 [219]

Amplitude-Phase Holograms of Vibration Patterns. (E/T) M. A. Zonkhiev – 209 [252]

Reverberation of the Acoustic Signals of River Boats. (E) V. N. Arabadzhi and E. S. Prokhorov – 256 [309]

The Quality of Vocoder Speech. (R) A. D. Arkhipova and M. A. Sapozhkov – 292 [245]

Automatic Discrimination of Noisy and Quasiperiodic Speech Sounds by the Phase Plane Method. (T/E) B. M. Lobanov – 353 [425]

Determination of the Equivalent Parameters of Transducers from Impedance or Admittance Phase Diagrams. (T/E) V. A. Lovyagin – 357 [429]

Investigation of the Coherence of a Continuous Sound Signal in the Sea. (E) V. I. Barbyshev, N. A. Vasil'ev, and S. G. Gershman – 392 [470]

Some Statistical Properties of Sea Reverberation. (E/T) T. S. Kvyatkovskaya – 396 [474]

Digital Computer Control of Acoustical Vibration Measurements. (T/E) G. S. Lyubashevskii and B. D. Tartakovskii – 398 [476]

Application of Statistical Experimental Design Techniques to Determine the Relation between the Velocity of Ultrasound and the Composition of a Multicomponent System. (E) N. N. Barabanov and L. G. Saichuk – 436 [511]

Statistical Distribution of the Periods of the Fundamental Tone of Russian Speech. (T/E) Yu. V. Mikheev – 474 [558]

AEROACOUSTICS, MACROSONICS, GROSS MOVEMENT OF MATTER BY SOUND, ACOUSTIC STREAMING, SHOCK WAVES, AEROSOL COAGULATION

Sound Radiation by a Cavitation Zone. (T) Yu. Ya. Boguslavskii, A. I. Ioffe, and K. A. Naugol'nykh – 17 [20]

Theory of Low-Frequency Noise in the Ocean. (T/E) M. A. Isakovich and B. F. Kur'yanov – 49 [62]

Influence of Polymer Additives on the Pressure Fluctuations in a Boundary Layer. (E) I. F. Kadykov and L. M. Lyamshev – 59 [75]

Investigation of the Acoustical and Gas-Dynamical Characteristics of a Jet Silencer. (E) S. Yu. Krasheninnikov, L. I. Sorkin, M. N. Tolstosheev, and O. V. Yakovlevskii – 69 [88]

On the Spectra of High-Intensity Noise. (T) V. P. Kuznetsov – 129 [155]

Estimation of the Acoustic Radiation in Slotted Boundary-Layer Suction. (T) L. M. Lyamshev – 133 [158]

Propagation of Finite-Amplitude Waves in an Ideal Dissociating Gas. (T) O. V. Rudenko and S. I. Soluyan – 137 [161]
Calculation of the Random Vibration Characteristics of a Panel in the Sound Field of an Exhaust Jet. (T/E) K. G. Valeev and V. E. Kvitka – 184 [219]
Modulation of Sound by Sound in the Intersection of Sound Waves. (T/E) V. A. Zverev and A. I. Kalachev – 204 [245]
An Acoustic Reduction Technique for Low-Frequency Sound Propagating in a Waveguide. (T) A. D. Lapin – 233 [281]
Cross Spectrum of Low-Frequency Pseudosonic Turbulent Pressures. (T/E) A. V. Smol'yakov – 241 [291]
Reverberation of the Acoustic Signals of River Boats. (E) V. N. Arabadzhi and E. S. Prokhorov – 256 [309]
Investigation of the Thermal Generation of Sound in a Rijke Tube. (E) V. N. Marchenko and V. I. Timoshenko – 274 [323]
Influence of Turbulent Diffusion on the Variation of the Size of a Gas Bubble in a Liquid. (T) Yu. N. Kalashnikov – 452 [530]
Equations of Nonlinear Acoustics. (T) V. P. Kuznetsov – 467 [548]
Calculation of the Relative Motion of Aerosol Particles in a Sound Field. (T) V. I. Timoshenko – 485 [570]
On the Standard and Curl Forms of the Streaming Equation. (T) O. V. Rudenko and S. I. Soluyan – 534 [619]
Effect of Turbulence on the Magnitude of the Acoustic Streaming Velocity. (E/T) N. G. Semenova – 537 [622]

ARCHITECTURAL ACOUSTICS

Auditorium and Room Acoustics, Sound Systems

Analysis of the Frequency Dependence of the Sound Pressure in an Enclosure. (T) S. B. Baron and A. A. Yanpol'skii – 163 [192]
Audience Sound Absorption: Research Methods and Results. (R) V. V. Furduev – 282 [332]

Sound Absorption and Insulation: Theory, Measurement, and Materials

Normalization of the Acoustic Reduction in Buildings. (T/E) V. I. Zaborov – 43 [54]
Soundproofing by Means of Ducts with Curved Porous Walls. (T) F. E. Grigor'yan – 192 [229]
An Acoustic Reduction Technique for Low-Frequency Sound Propagating in a Waveguide. (T) A. D. Lapin – 233 [281]
Audience Sound Absorption: Research Methods and Results. (R) V. V. Furduev – 282 [332]
The Spatial Damping Anomaly in Thin-Walled Cylindrical Shells. (T) R. N. Mikhailov and B. D. Tartakovskii – 471 [554]

BIOACOUSTICS, MEDICAL ULTRASONICS (see also Physiological, Psychological Acoustics)

Absorption of Ultrasonic Waves in Aqueous Solutions of Biopolymers. (E) S. Kh. Sadykhova and I. E. El'piner – 101 [129]

Response Characteristics of Unit Neurons in the Auditory Center of the Midbrain of the Frog (Rana Ridibunda) to Tone Stimuli. (E) N. G. Bibikov – 168 [199]
On the Emission of Echo-Location Signals by the Azov Sea Harber Porpoise. (E) N. A. Dubrovskii, P. S. Krasnov, and A. A. Titov – 444 [521]

GENERAL, UNCLASSIFIED

Statistical Calculation of the Complex Bulk Elastic Modulus. (T/E) É. T. Bruk-Levinson, V. S. Nemtsov, and L. A. Rott – 174 [206]

Biographical and Historical

From the General Physics and Astronomy Branch of the Academy of Sciences of the USSR. (R) – 140 [164]
Seventh International Congress on Acoustics. (R) – 139 [164]
Conference on Solid State Ultrasonics. (R) G. I. Prokopenko – 412 [487]
Acoustical Society of Spain. (R) – 416 [489]

Events, Announcements

100th Anniversary of the Birth of V. I. Lenin. (R) – 1 [1]
N. N. Andreev (On His 90th Birthday). – 279 [329]

INSTRUMENTS AND APPARATUS

Measuring Instruments

Use of the Odd Harmonics of a Piezoelectric Radiator in an Ultrasonic Interferometer for Liquids. (E) V. Ilgunas, K. Paulauskas, and A. Tamashauskas – 122 [148]
Contactless Vibrometer for Measurement of the Displacement Amplitudes in Ultrasonic Vibratory Systems. (E) Yu. I. Kitaigorodskii and A. V. Stamov-Vitkovskii – 126 [152]
A Lead Zirconate-Titanate (TsTS 13/1) Ceramic Spherical Hydrophone. (E) A. A. Anan'eva, G. I. Gusakova, L. R. Zaionts, and A. V. Sosnov – 253 [306]
Determination of the Equivalent Parameters of Transducers from Impedance or Admittance Phase Diagrams. (T/E) V. A. Lovyagin – 357 [429]
Measurement of Variable Pressure in a Liquid. (E) P. A. Pavlov and V. P. Skripov – 408 [484]

Transducers (see also Ultrasonics – Solids)

Comparison of the Properties of Transducers Made from Different Magnetostrictive Materials. (E) V. N. Valuev, L. I. Ganeva, and I. P. Golyamina – 26 [32]
Pulsed Electrodynamic Radiators. (T/E) N. A. Roi – 94 [121]
Investigation of the Possibilities for Broadening the Transmission Band of Cylindrical Piezoelectric Ceramic Transducers. (T) D. B. Dianov and A. G. Kuz'menko – 197 [236]
A Lead Zirconate-Titanate (TsTS 13/1) Ceramic Spherical Hydrophone. (E) A. A. Anan'eva, G. I. Gusakova, L. R. Zaionts, and A. V. Sosnov – 253 [306]
Influence of the Parameters of Gallium Arsenide on the Characteristics of Diffusion-Layer Transducers. (E/T) V. S. Vasil'ev and I. N. Kanevskii – 319 [383]
Technological Efficiency of Plane High-Frequency Ultrasonic Radiators. (T) I. N. Kanevskii – 327 [393]
Mutual Radiation Impedance of Small Pistons in a Convex Baffle. (T) Yu. Yu. Dobrovol'skii – 440 [516]
A Variant of the Luneberg Acoustic Lens. (T) I. N. Kanevskii and B. S. Surikov – 457 [536]

MECHANICAL VIBRATIONS AND SHOCK, INSULATION, SEISMOLOGY, SOILS

Aspects of the Radiation of Sound by Waves on Curvilinear Boundaries. (T) L. M. Brekhovskikh, V. V. Goncharov, V. S. Gostev – 21 [25]
Pulsed Electrodynamic Radiators. (T/E) N. A. Roi – 94 [121]
Contactless Vibrometer for Measurement of the Displacement Amplitudes in Ultrasonic Vibratory Systems. (E) Yu. I. Kitaigorodskii and A. V. Stamov-Vitkovskii – 126 [152]
Calculation of the Random Vibration Characteristics of a Panel in the Sound Field of an Exhaust Jet. (T/E) K. G. Valeev and V. E. Kvitka – 184 [219]
Amplitude-Phase Holograms of Vibration Patterns. (E/T) M. A. Zonkhiev – 209 [252]
Synthesis and Investigation of Longitudinal-Mode Absorbers in Beams and Plates. (T/E) V. I. Kashina, V. V. Tyutekin, and A. I. Shkvarnikov – 213 [257]

Bandwidth of Armored Vibration-Damping Structures. (T) V. I. Kashina and V. V. Tyutekin – 269 [318]
Digital Computer Control of Acoustical Vibration Measurements. (T/E) G. S. Lyubashevskii and B. D. Tartakovskii – 398 [476]
The Spatial Damping Anomaly in Thin-Walled Cylindrical Shells. (T) R. N. Mikhailov and B. D. Tartakovskii – 471 [554]
Waveguide Propagation of Oscillations in a Floating Solid Plate and a Contiguous Compressible Fluid Layer. (T) D. E. Kheisin – 495 [584]

NOISE AND NOISE CONTROL IN AIRCRAFT, CITIES, INDUSTRY, AND TRANSPORTATION

Normalization of the Acoustic Reduction in Buildings. (T/E) V. I. Zaborov – 43 [54]
Investigation of the Acoustical and Gas-Dynamical Characteristics of a Jet Silencer. (E) S. Yu. Krasheninnikov, L. I. Sorkin, M. N. Tolstosheev, and O. V. Yakovlevskii – 69 [88]
On the Spectra of High-Intensity Noise. (T) V. P. Kuznetsov – 129 [155]
Estimation of the Acoustic Radiation in Slotted Boundary-Layer Suction. (T) L. M. Lyamshev – 133 [158]
Calculation of the Random Vibration Characteristics of a Panel in the Sound Field of an Exhaust Jet. (T/E) K. G. Valeev and V. E. Kvitka – 184 [219]
Soundproofing by Means of Ducts with Curved Porous Walls. (T) F. E. Grigor'yan – 192 [229]
Bandwidth of Armored Vibration-Damping Structures. (T) V. I. Kashina and V. V. Tyutekin – 269 [318]

PHYSIOLOGICAL AND PSYCHOLOGICAL ACOUSTICS; EAR AND HEARING (see also Bioacoustics)

Response Characteristics of Unit Neurons in the Auditory Center of the Midbrain of the Frog (Rana Ridibunda) to Tone Stimuli. (E) N. G. Bibikov – 168 [199]
On the Emission of Echo-Location Signals by the Azov Sea Harbor Porpoise. (E) N. A. Dubrovskii, P. S. Krasnov, and A. A. Titov – 444 [521]
Bird Song: Acoustics and Physiology. (R) Crawford H. Greenewalt. Reviewed by V. Babkin – 545 [629]

RADIATION AND SCATTERING

Mathematical Wave Theory, Ray Acoustics

Convergent and Divergent Sound Beams in Nonlinear Media. (T) E. A. Zabolotskaya and R. V. Khokhlov – 39 [49]
Sound Field of a Harmonic Source about an Infinite Thin Plate in a Homogeneous Medium (Continuous Spectrum). (T) V. M. Kurtepov – 76 [96]
Modifications of the Method of Cross Sections. (T) N. E. Mal'tsev – 81 [102]
On the Separability of the Vector Wave Equation. (T) O. I. Grossman and A. A. Kleshchev – 120 [147]
Scattering of a Sound Wave by Ideal Prolate Spheroids. (T) A. A. Kleshchev and L. S. Sheiba – 219 [264]
Radiation and Scattering of Sound by a Cylinder in a Viscous Medium. (T) V. N. Kozhin – 223 [269]
Diffraction of a Plane Wave by a Partial Periodic Grating. (T) V. M. Astapenko and G. D. Malyuzhinets – 299 [354]
Diffraction of a Cylindrical Wave by a Weakly-Reflecting Cylindrical Shell. (T) N. N. Beloozerov and I. I. Dolgova – 306 [364]
Acoustic Oscillations in an Ellipsoidal Cavity. (T) V. P. Bykov and V. V. Elov – 312 [372]
Radiation Directivity of Spherical Transducers with Mixed Boundary Conditions. (T) M. I. Karnovskii, V. G. Lozovik, I. L. Oboznenko, and V. P. Pugach – 331 [398]
Scattering and Absorption of a Plane Sound Wave by a Cylinder of Arbitrary Radius in a Viscous Medium. (T) V. N. Kozhin – 335 [403]
Diffraction of Plane Sound Waves by a Sphere in a Viscous Medium. (T) P. I. Tsoi – 381 [458]
Sound Radiation from a Cylindrical Shell. (T) R. N. Mikhailov – 401 [478]
On the Error in the Calculation of a Finite-Amplitude Wave Radiated by a Spherical Cavity in the Kirkwood-Bethe Approximation. (T) V. P. Morozov – 403 [480]
Determination of the Sound Pressure near the Surface of an Infinite Plate Driven by a Point Source. (T) V. S. Ivanov and V. N. Romanov – 448 [526]
A Variant of the Luneberg Acoustic Lens. (T) I. N. Kanevskii and B. S. Surikov – 457 [536]
Sound Propagation in a Viscous Medium Containing Cylindrical Filaments. (T) V. N. Kozhin – 462 [542]
Equations of Nonlinear Acoustics. (T) V. P. Kuznetsov – 467 [548]
Scattering of a Normal Mode by Irregularities of Finite Area on a Plate. (T) I. P. Firsov – 489 [575]
Waveguide Propagation of Oscillations in a Floating Solid Plate and a Contiguous Compressible Fluid Layer. (T) D. E. Kheisin – 495 [584]
Diffraction of Stationary Sound Waves by a Moving Sphere. (T) P. I. Tsoi – 500 [590]
Directivity of Radiators Operating through Transmission Layers. (T) B. N. Alekseev and D. B. Dianov – 506 [597]
Holographic Method for the Investigation of Light Diffraction by Ultrasound. (E/T) I. S. Klimenko and V. I. Teleshevskii – 526 [613]
On the Standard and Curl Forms of the Streaming Equation. (T) O. V. Rudenko and S. I. Soluyan – 534 [619]

Physical Effects of Sound (see also Ultrasonics – Physical Effects)

Modulation of Sound by Sound in the Intersection of Sound Waves. (T/E) V. A. Zverev and A. I. Kalachev – 204 [245]
The Fluctuation-Dissipation Theorem and Sound Absorption. (T) L. I. Lisnyanskii – 348 [419]
Calculation of the Relative Motion of Aerosol Particles in a Sound Field. (T) V. I. Timoshenko – 485 [570]
Effect of Turbulence on the Magnitude of the Acoustic Streaming Velocity. (E/T) N. G. Semenova – 537 [622]

Radiation from Vibrating Objects in Air and Other Gases, Acoustic Impedance, Sources

Aspects of the Radiation of Sound by Waves on Curvilinear Boundaries. (T) L. M. Brekhovskikh, V. V. Goncharov and V. S. Gostev – 21 [25]
Investigation of the Acoustical and Gas-Dynamical Characteristics of a Jet Silencer. (E) S. Yu. Krasheninnikov, L. I. Sorkin, M. N. Tolstosheev, and O. V. Yakovlevskii – 69 [88]
Sound Field of a Harmonic Source about an Infinite Thin Plate in a Homogeneous Medium (Continuous Spectrum). (T) V. M. Kurtepov – 76 [96]
Matching Double Layers for a Complex-Impedance Boundary. (T) V. A. Pirogov and B. D. Tartakovskii – 91 [116]
Pulsed Electrodynamic Radiators. (T/E) N. A. Roi – 94 [121]
Characteristic Point-Force Impedance of a Cylindrical Shell. (T/E) V. T. Lyapunov and T. D. Rozhinova – 131 [156]
Estimation of the Acoustic Radiation in Slotted Boundary-Layer Suction. (T) L. M. Lyamshev – 133 [158]
Synthesis and Investigation of Longitudinal-Mode Absorbers in Beams and Plates. (T/E) V. I. Kashina, V. V. Tyutekin, and A. I. Shvarnikov – 213 [257]
Radiation and Scattering of Sound by a Cylinder in a Viscous Medium. (T) V. N. Kozhin – 223 [269]
Sound Transmission through a Perforated Plate of Finite Thickness. (T) E. L. Shenderov – 244 [295]
Pulsed Excitation of Transducers. (T) Yu. E. Nevskii – 276 [324]
Radiation Directivity of Spherical Transducers with Mixed Boundary Conditions. (T) M. I. Karnovskii, V. G. Lozovik, I. L. Oboznenko, and V. P. Pugach – 331 [398]
Sound Radiation from a Cylindrical Shell. (T) R. N. Mikhailov – 401 [478]
Mutual Radiation Impedance of Small Pistons in a Convex Baffle. (T) Yu. Yu. Dobrovol'skii – 440 [516]

Determination of the Sound Pressure near the Surface of an Infinite Plate Driven by a Point Source. (T) V. S. Ivanov and V. N. Romanov – 448 [526]
Directivity of Radiators Operating through Transmission Layers. (T) B. N. Alekseev and D. B. Dianov – 506 [597]

Reflection, Refraction, Diffraction, and Interference

Sound Field of a Harmonic Source about an Infinite Thin Plate in a Homogeneous Medium (Continuous Spectrum). (T) V. M. Kurtepov – 76 [96]
Scattering of Elastic Normal Modes in a Plate with a Two-Dimensional Surface Roughness Distribution. (T) L. G. Merkulov and I. P. Firsov – 86 [110]
Modulation of Sound by Sound in the Intersection of Sound Waves. (T/E) V. A. Zverev and A. I. Kalachev – 204 [245]
Scattering of a Sound Wave by Ideal Prolate Spheroids. (T) A. A. Kleshchëv and L. S. Sheiba – 219 [264]
Sound Transmission through a Perforated Plate of Finite Thickness. (T) E. L. Shenderov – 244 [295]
Technique for the Precision Measurement of Ultrasonic Velocity Dispersion in Liquids. (E) K. M. Burundukov and and A. M. Lobanov – 259 [311]
Diffraction of a Plane Wave by a Partial Periodic Grating. (T) V. M. Astapenko and G. D. Malyuzhinets – 299 [354]
Diffraction of a Cylindrical Wave by a Weakly-Reflecting Cylindrical Shell. (T) N. N. Beloozerov and I. I. Dolgova – 306 [364]
Scattering and Absorption of a Plane Sound Wave by a Cylinder of Arbitrary Radius in a Viscous Medium. (T) V. N. Kozhin – 335 [403]
Diffraction of Plane Sound Waves by a Sphere in a Viscous Medium. (T) P. I. Tsoi – 381 [458]
The Additional Mass of Special Gratings. (T) V. M. Astapenko – 389 [468]
Mutual Radiation Impedance of Small Pistons in a Convex Baffle. (T) Yu. Yu. Dobrovol'skii – 440 [516]
A Variant of the Luneberg Acoustic Lens. (T) I. N. Kanevskii and B. S. Surikov – 457 [536]
Sound Propagation in a Viscous Medium Containing Cylindrical Filaments. (T) V. N. Kozhin – 462 [542]
Scattering of a Normal Mode by Irregularities of Finite Area on a Plate. (T) I. P. Firsov – 489 [575]
Diffraction of Stationary Sound Waves by a Moving Sphere. (T) P. I. Tsoi – 500 [590]
Directivity of Radiators Operating through Transmission Layers. (T) B. N. Alekseev and D. B. Dianov – 506 [597]

Velocity and Attenuation of Sound Waves

Sound Absorption in Molten Tin and Thallium. (E) M. B. Gitis, I. G. Mikhailov, and S. Niyazov – 113 [141]
Influence of Alloying Elements on the Velocity of Ultrasound in Magnesium. (E/T) M. E. Drits, L. L. Zusman, and L. L. Rokhlin – 201 [241]
Dynamics of Sound Waves in Dissipative Media. (T) A. Yu. Maksimov, B. I. Maksimov, and G. D. Mikhailov – 272 [321]
Scattering and Absorption of a Plane Sound Wave by a Cylinder of Arbitrary Radius in a Viscous Medium. (T) V. N. Kozhin – 335 [403]
The Spatial Damping Anomaly in Thin-Walled Cylindrical Shells. (T) R. N. Mikhailov and B. D. Tartakovskii – 471 [554].

Wave Propagation in Tubes

Soundproofing by Means of Ducts with Curved Porous Walls. (T) F. E. Grigor'yan – 192 [229]
An Acoustic Reduction Technique for Low-Frequency Sound Propagating in a Waveguide. (T) A. D. Lapin – 233 [281]
Investigation of the Thermal Generation of Sound in a Rijke Tube. (E) V. N. Marchenko and V. I. Timoshenko – 274 [323]

Waves in Bounded Media, Normal Modes, Surface Modes

Amplification of Rayleigh Waves in Gallium Arsenide Crystals. (T) I. A. Viktorov – 30 [37]
Analysis of a Cylindrical Piezoceramic Transducer in Radially Symmetric Modes. (T) D. B. Dianov and A. G. Kuz'menko – 34 [42]
Forced Finite Oscillations of a Layer with Dissipative Losses. (T) L. K. Zarembo – 46 [58]
Modifications of the Method of Cross Sections. (T) N. E. Mal'tsev – 81 [102]
Scattering of Elastic Normal Modes in a Plate with a Two-Dimensional Surface Roughness Distribution. (T) L. G. Merkulov and I. P. Firsov – 86 [110]
Matching Double Layers for a Complex-Impedance Boundary. (T) V. A. Pirogov and B. D. Tartakovskii – 91 [116]
Synthesis and Investigation of Longitudinal-Mode Absorbers in Beams and Plates. (T/E) V. I. Kashina, V. V. Tyutekin, and A. I. Shkvarnikov – 213 [257]
Surface Wave Amplification. (T) L. M. Lyamshev – 270 [319]
Acoustic Oscillations in an Ellipsoidal Cavity. (T) V. P. Bykov and V. V. Elov – 312 [372]
Determination of the Sound Pressure near the Surface of an Infinite Plate Driven by a Point Source. (T) V. S. Ivanov and V. N. Romanov – 448 [526]
The Spatial Damping Anomaly in Thin-Walled Cylindrical Shells. (T) R. N. Mikhailov and B. D. Tartakovskii – 471 [554]
Waveguide Propagation of Oscillations in a Floating Solid Plate and a Contiguous Compressible Fluid Layer. (T) D. E. Kheisin – 495 [584]
Phase Velocities of Surface Elastic Waves in the Plane of Symmetry of the Elastic Properties of α-Quartz. (T) D. F. Kravchenko and D. A. Tursunov – 529 [615]

SPECIAL TOPICS IN ACOUSTICS, UNCONVENTIONAL APPLICATIONS

Response Characteristics of Unit Neurons in the Auditory Center of the Midbrain of the Frog (Rana Ridibunda) to Tone Stimuli. (E) N. G. Bibikov – 168 [199]
Reverberation of the Acoustic Signals of River Boats. (E) V. N. Arabadzhi and E. S. Prokhorov – 256 [309]
On the Acoustic Inspection of Granaries for Infestation by Grain Pests. (E) L. R. Gavrilov and M. G. Sirotyuk – 262 [313]
Digital Computer Control of Acoustical Vibration Measurements. (T/E) G. S. Lyubashevskii and B. D. Tartakovskii – 398 [476]
On the Emission of Echo-Location Signals by the Azov Sea Harbor Porpoise. (E) N. A. Dubrovskii, P. S. Krasnov, and A. A. Titov – 444 [521]
Bird Song: Acoustics and Physiology. Crawford H. Greenewalt. Reviewed by V. Babkin – 545 [629]

SPEECH COMMUNICATION (see also Acoustic Signal Processing)

Normalization of the Acoustic Reduction in Buildings. (T/E) V. I. Zaborov – 43 [54]
The Quality of Vocoder Speech. (R) A. D. Arkhipova and and M. A. Sapozhkov – 292 [345]
Automatic Discrimination of Noisy and Quasiperiodic Speech Sounds by the Phase Plane Method. (T/E) B. M. Lobanov – 353 [425]
Statistical Distribution of the Periods of the Fundamental Tone of Russian Speech. (T/E) Yu. V. Mikheev – 474 [558]

STANDARDS

Compilations of Standards of the Unified System of Constructor Documentation. (R) – 422 [493]

ULTRASONICS AND HYPERSONICS

Biological Effects (see also Bioacoustics)

Absorption of Ultrasonic Waves in Aqueous Solutions of Biopolymers. (E) S. Kh. Sadykhova and I. E. Él'piner – 101 [129]

Chemical Effects

Kinetics of Ultrasonic Chemical Reactions. (T/E) M. A. Margulis – 361 [434]

Gases, Ultrasonic Velocity, Dispersion, Absorption (see also Radiation and Scattering, Aeroacoustics)

Propagation of Finite-Amplitude Waves in an Ideal Dissociating Gas. (T) O. V. Rudenko and S. I. Soluyan – 137 [161]

Experimental Investigation of Translational Dispersion in Some Inert Gases. (E/T) E. D. Popov and V. F. Yakovlev – 372 [447]

Intersection of the Ultrasonic Velocity Curves for Substances in the Liquid and Vapor Phases near the Critical Point. (E) V. F. Nozdrev and P. S. Petukhov – 405 [482]

Investigation of Vibrational and Translational Dispersion in Benzene Vapor. (E) V. I. Seregina – 410 [485]

Equations of Nonlinear Acoustics. (T) V. P. Kuznetsov – 467 [548]

Instruments

Comparison of the Properties of Transducers Made from Different Magnetostrictive Materials. (E) V. N. Valuev, L. I. Ganeva, and I. P. Golvamina – 26 [32]

Efficiency of High-Frequency Ultrasonic Concentrators. (T) I. N. Kanevskii – 64 [81]

Pulsed Electrodynamic Radiators. (T/E) N. A. Roi – 94 [121]

Use of the Odd Harmonics of a Piezoelectric Radiator in an Ultrasonic Interferometer for Liquids. (E) V. Ilgunas, K. Paulauskas, and A. Tamashauskas – 122 [148]

Contactless Vibrometer for Measurement of the Displacement Amplitudes in Ultrasonic Vibratory Systems. (E) Yu. I. Kitaigorodskii and A. V. Stamov-Vitkovskii – 126 [152]

Ultrasonic Semiconductor Transducers with an Exponential Conductivity-Thickness Distribution. (T) Yu. E. Nevskii – 135 [160]

Selection of the Parameters of Curvilinear Concentrators to Give a Predetermined Oscillation Frequency. (T/E) I. Kh. Buturovich and Khan Dyk Kim – 179 [213]

Investigation of the Possibilities for Broadening the Transmission Band of Cylindrical Piezoelectric Ceramic Transducers. (T) D. B. Dianov and A. G. Kuz'menko – 197 [236]

Technological Efficiency of Plane High-Frequency Ultrasonic Radiators. (T) I. N. Kanevskii – 327 [393]

Determination of the Equivalent Parameters of Transducers from Impedance or Admittance Phase Diagrams. (T/E) V. A. Lovyagin – 357 [429]

Measurement of Variable Pressure in a Liquid. (E) P. A. Pavlov and V. P. Skripov – 408 [484]

A Variant of the Luneberg Acoustic Lens. (T) I. N. Kanevskii and B. S. Surikov – 457 [536]

Equations of Nonlinear Acoustics. (T) V. P. Kuznetsov – 467 [548]

Investigation of Ultrasonic Fractures in Rods. (T/E) Yu. F. Balalaev – 509 [599]

Liquids, Ultrasonic Velocity, Dispersion, Absorption, Cavitation

Sound Radiation by a Cavitation Zone. (T) Yu. Ya. Boguslavskii, A. I. Ioffe, and K. A. Naugol'nykh – 17 [20]

Absorption of Ultrasonic Waves in Aqueous Solutions of Biopolymers. (E) S. Kh. Sadykhova and I. E. El'piner – 101 [129]

Sound Absorption in Molten Tin and Thallium (E) M. B. Gitis, I. G. Mikhailov, and S. Niyazov – 113 [141]

Sonoluminescence of Aqueous Solutions of Sucrose and Glycerin. (E) P. I. Golubnichii, V. D. Goncharov, and Kh. V. Protopopov – 115 [142]

Acoustical Properties of Azeotropic Mixtures. (E) V. I. Grechkin G. I. Novikov, and V. F. Nozdrev – 118 [145]

Use of the Odd Harmonics of a Piezoelectric Radiator in an Ultrasonic Interferometer for Liquids. (E) V. Ilgunas, K. Paulauskas, and A. Tamashauskas – 122 [148]

Stabilization of Gas Bubbles in Water. (E) M. G. Sirotyuk – 237 [286]

Ultra- and Hypersonic Properties of Some Organic Liquids. (E/T) S. S. Aliev, L. E. Kvasova, L. V. Lanshina, K. Parpiev, and P. K. Khabibullaev – 250 [304]

Technique for the Precision Measurement of Ultrasonic Velocity Dispersion in Liquids. (E) K. M. Burundukov and A. M. Lobanov – 259 [311]

Experimental Study of the Absorption of Ultrasound in Acetic Acid – Carbon Tetrachloride Binary Systems. (E/T) V. N. Zalivchii and V. I. Moklyak – 264 [315]

Kneser Absorption in Mixtures of Bromobenzene, Chlorobenzene, and Cyclohexane in Benzene, and of Chlorobenzene in Bromobenzene. (E) V. Ilgunas, K. Paulauskas, and A. Tamashauskas – 266 [316]

Second Relaxation Interval in Carboxylic Acids. (E/T) L. V. Lanshina, M. I. Lupina, and P. K. Khabibullaev – 343 [413]

Acoustic Relaxation in Liquid Ethylene Glycol and Diethylene Glycol. (E) S. S. Aliev, K. Parpiev, and P. K. Khabibullaev – 387 [466]

Sound Absorption in Liquid Sulfur. (E/T) M. B. Gitis, I. G. Mikhailov, and S. Niyazov – 394 [472]

On the Error in the Calculation of a Finite-Amplitude Wave Radiated by a Spherical Cavity in the Kirkwood-Bethe Approximation. (T) V. P. Morozov – 403 [480]

Intersection of the Ultrasonic Velocity Curves for Substances in the Liquid and Vapor Phases near the Critical Point. (E) V. F. Nozdrev and P. S. Petukhov – 405 [482]

Measurement of Variable Pressure in a Liquid. (E) P. A. Pavlov and V. P. Skripov – 408 [484]

Effect of Molecular Motion on Acoustic Resonance. (R) A. R. Kessel' – 425 [497]

Application of Statistical Experimental Design Techniques to Determine the Relation between the Velocity of Ultrasound and the Composition of a Multicomponent System. (E) N. N. Barabanov and L. G. Saichuk – 436 [511]

Influence of Turbulent Diffusion on the Variation of the Size of a Gas Bubble in a Liquid. (T) Yu. N. Kalashnikov – 452 [530]

Elasticity and Strength of Stable Gas Bubbles in Water. (E/T) M. G. Sirotyuk – 482 [567]

Absorption of Ultrasound by Certain Crystal Polymers in the Melting Region. (E) N. A. Bordelius and V. K. Semenchenko – 519 [608]

Ultra- and Hypersonic Characteristics of Liquid Fluorobenzene and Iodobenzene. (E/T) K. Parpiev, P. K. Khabibullaev and Yu. G. Shoroshev – 531 [617]

Investigation of Combined Dispersion in n-Paraffin Vapors. (E) A. I. Sapozhnikov and V. F. Yakovlev – 535 [620]

Experimental Investigation of Combined Dispersion in Furan and Pyridine Vapors. (E) V. I. Seregina and V. F. Yakovlev – 540 [625]

Investigation of the Growth of a Gas Bubble in Water due to "Rectified" Diffusion in a Noise Field. (T) A. V. Chalov – 543 [627]

Physical Effects, Optical Diffraction, Ultrasonic Processing

Ultrasonic Synchronization of Laser Emission. (E) G. N. Belova – 110 [138]

Sonoluminescence of Aqueous Solutions of Sucrose and Glycerin. (E) P. I. Golubnichii, V. D. Goncharov, and Kh. V. Protopopov – 115 [142]

Modulation of Sound by Sound in the Intersection of Sound Waves. (T/E) V. A. Zverev and A. I. Kalachev – 204 [245]

Amplitude-Phase Holograms of Vibration Patterns. (E/T) M. A. Zonkhiev – 209 [252]

Sonoluminescence in Various Liquids. (E) P. I. Golubnichii, V. D. Goncharov, and Kh. V. Protopopov – 323 [388]

Effect of Molecular Motion on Acoustic Resonance. (R) A. R. Kessel' – 425 [497]

Investigation of Ultrasonic Fractures in Rods. (T/E) Yu. F. Balalaev – 509 [599]

Effect of Ultrasound on Diffusion Processes in a Gel – Liquid System. (E) B. G. Belov – 514 [603]

Holographic Method for the Investigation of Light Diffraction by Ultrasound. (E/T) I. S. Klimenko and V. I. Teleshevskii – 526 [613]

Relaxation Processes in Solids, Liquids, and Gases

Absorption of Ultrasonic Waves in Aqueous Solutions of Biopolymers. (E) S. Kh. Sadykhova and I. E. Él'piner – 101 [129]

Acoustic Relaxation in Nitrobenzene–n-Hexane Solutions Having a Critical Stratification Point. (E) S. S. Aliev and P. K. Khabibullaev – 108 [137]

Temperature Dependence of the Vibrational Relaxation Time in Oxygen (T/E) I. Ismailov and A. A. Senkevich – 124 [150]

Propagation of Finite-Amplitude Waves in an Ideal Dissociating Gas. (T) O. V. Rudenko and S. I. Soluyan – 137 [161]

Statistical Calculation of the Complex Bulk Elastic Modulus. (T/E) É. T. Bruk-Levinson, V. B. Nemtsov, and L. A. Rott – 174 [206]

Ultra- and Hypersonic Properties of Some Organic Liquids. (E/T) S. S. Aliev, L. E. Kvasova, L. V. Lanshina, K. Parpiev, and P. K. Khabibullaev – 250 [304]

Experimental Study of the Absorption of Ultrasound in Acetic Acid–Carbon Tetrachloride Binary Systems. (E/T) V. N. Zalivchii and V. I. Moklyak – 264 [315]

The Fluctuation-Dissipation Theorem and Sound Absorption. (T) L. I. Lisnyanskii – 348 [419]

Acoustic Relaxation in Liquid Ethylene Glycol and Diethylene Glycol. (E) S. S. Aliev, K. Parpiev, and P. K. Khabibullaev – 387 [466]

Investigation of Vibrational and Translational Dispersion in Benzene Vapor. (E) V. I. Seregina – 410 [485]

Effect of Molecular Motion on Acoustic Resonance. (R) A. R. Kessel' – 425 [497]

Amplitude Dependence of the Internal Friction of Synthetic Quartz Crystals. (E) B. I. Ratkin and A. A. Fotchenkov – 478 [563]

Acoustic Relaxation in Hexyl and Heptyl Alcohols. (E) U. Gadaibaev, T. Mamanov, and P. K. Khabibullaev – 522 [610]

Ultra- and Hypersonic Characteristics of Liquid Fluorobenzene and Iodobenzene. (E/T) K. Parpiev, P. K. Khabibullaev, and Yu. G. Shoroshev – 531 [617]

Investigation of Combined Dispersion in n-Paraffin Vapors. (E) A. I. Sapozhnikov and V. F. Yakovlev – 535 [620]

Experimental Investigation of Combined Dispersion in Furan and Pyridine Vapors. (E) V. I. Seregina and V. F. Yakovlev – 540 [625]

Solids, Ultrasonic Velocity, Dispersion, Absorption, Parametric Amplification, Transducer Materials, Focusing Systems

Absorption of Ultrasound in Semiconducting $A^{III}B^{V}$ Compounds. (E/T) B. A. Bobylev and A. F. Kravchenko – 13 [15]

Comparison of the Properties of Transducers Made from Different Magnetostrictive Materials. (E) V. N. Valuev, L. I. Ganeva, and I. P. Golyamina – 26 [32]

Amplification of Rayleigh Waves in Gallium Arsenide Crystals. (T) I. A. Viktorov – 30 [37]

Analysis of a Cylindrical Piezoceramic Transducer in Radially Symmetric Modes. (T) D. B. Dianov and A. G. Kuz'manko – 34 [42]

Efficiency of High-Frequency Ultrasonic Concentrators. (T) I. N. Kanevskii – 64 [81]

Matching Double Layers for a Complex-Impedance Boundary. (T) V. A. Pirogov and B. D. Tartakovskii – 91 [116]

Ultrasonic Semiconductor Transducers with an Exponential Conductivity-Thickness Distribution. (T) Yu. E. Nevskii – 135 [160]

Ultrasonic Methods for the Investigation of Semiconducting Piezoelectric Materials. (R) V. S. Vasil'ev and I. N. Kanevskii – 145 [169]

Selection of the Parameters of Curvilinear Concentrators to Give a Predetermined Oscillation Frequency. (T/E) I. Kh. Buturovich and Khan Dyk Kim – 179 [213]

Influence of Orientation and Crystallization on the Velocity of Ultrasound in Polyethylene Terephthalate. (E/T) V. A. Grechishkin, L. G. Kazaryan, and I. I. Perepechko – 187 [223]

Influence of Alloying Elements on the Velocity of Ultrasound in Magnesium. (E/T) M. E. Drits, L. L. Zusman, and L. L. Rokhlin – 201 [241]

Losses in Metals at Low Ultrasonic Frequencies. (T/E) A. V. Kulemin and A. M. Mitskevich – 228 [275]

On the Acoustic Inspection of Granaries for Infestation by Grain Pests. (E) L. R. Gavrilov and M. G. Sirotyuk – 262 [313]

Surface Wave Amplification. (T) L. M. Lyamshev – 270 [319]

Pulsed Excitation of Transducers. (T) Yu. E. Nevskii – 276 [324]

Influence of the Parameters of Gallium Arsenide on the Characteristics of Diffusion-Layer Transducers. (E/T) V. S. Vasil'ev and I. N. Kanevskii – 319 [383]

Technological Efficiency of Plane High-Frequency Ultrasonic Radiators. (T) I. N. Kanevskii – 327 [393]

Theory of the Attenuation of Ultrasound in a Semiconductor in the Presence of a High-Frequency Electric Field. (T) O. A. Krylov and É. M. Épshtein – 340 [409]

Calculation of the Third-Order Elastic Constants from the Results of Ultrasonic Measurements. (T) S. S. Sekoyan – 377 [453]

Effect of Molecular Motion on Acoustic Resonance. (R) A. R. Kessel' – 425 [497]

Amplitude Dependence of the Internal Friction of Synthetic Quartz Crystals. (E) B. I. Ratkin and A. A. Fotchenkov – 478 [563]

Investigation of Ultrasonic Fractures in Rods. (T/E) Yu. F. Balalaev – 509 [599]

Absorption of Ultrasound by Certain Crystal Polymers in the Melting Region. (E) N. A. Bordelius and V. K. Semenchenko – 519 [608]

Phase Velocities of Surface Elastic Waves in the Plane of Symmetry of the Elastic Properties of α-Quartz. (T) D. F. Kravchenko and D. A. Tursunov – 529 [615]

UNDERWATER SOUND (see also Ultrasonics – Liquids)

Moiré Modeling of the Sound Field in a Wedge. (T/E) A. N. Barkhatov, N. V. Gorskaya, and N. A. Kachkhoeva – 9 [10]

Theory of Low-Frequency Noise in the Ocean. (T/E) M. A. Isakovich and B. F. Kur'yanov – 49 [62]

Cavitation, Bubbles, Turbulence, Splashing

Sound Radiation by a Cavitation Zone. (T) Yu. Ya. Boguslavskii, A. I. Ioffe, and K. A. Naugol'nykh – 17 [20]

Stabilization of Gas Bubbles in Water. (E) M. G. Sirotyuk – 237 [286]

Cross Spectrum of Low-Frequency Pseudosonic Turbulent Pressures. (T/E) A. V. Smol'yakov – 241 [291]

On the Error in the Calculation of a Finite-Amplitude Wave Radiated by a Spherical Cavity in the Kirkwood-Bethe Approximation. (T) V. P. Morozov – 403 [480]

Influence of Turbulent Diffusion on the Variation of the Size of a Gas Bubble in a Liquid. (T) Yu. N. Kalashnikov – 452 [530]

Elasticity and Strength of Stable Gas Bubbles in Water. (E/T) M. G. Sirotyuk – 492 [567]

Investigation of the Growth of a Gas Bubble in Water due to "Rectified" Diffusion in a Noise Field. (T) A. V. Chalov – 543 [627]

Echo Ranging, Sonar, Propagation and Reverberation, Sound Channels, Measurements

Aspects of the Radiation of Sound by Waves on Curvilinear Boundaries. (T) L. M. Brekhovskikh, V. V. Goncharov, and V. S. Gostev – 21 [25]

A Lead Zirconate-Titanate (TsTS 13/1) Ceramic Spherical Hydrophone. (E) A. A. Anan'eva, G. I. Gusakova, L. R. Zaionts, and A. V. Sosnov – 253 [306]

Investigation of the Coherence of a Continuous Sound Signal in the Sea. (E) V. I. Barbyshev, N. A. Vasil'ev, and S. G. Gershman – 392 [470]

Some Statistical Properties of Sea Reverberation. (E/T) T. S. Kvyatkovskaya – 396 [474]

On the Emission of Echo-Location Signals by the Azov Sea Harbor Porpoise. (E) N. A. Dubrovskii, P. S. Krasnov, and A. A. Titov – 444 [521]

Experimental Studies of Underwater Noise in the Ocean. (E)
V. I. Bardyshev, A. M. Velikanov, and S. G. Gershman – 512 [602]

Ice: Under-Ice Acoustics, Icebergs, Ice Covers and Floes
Waveguide Propagation of Oscillations in a Floating Solid Plate and a Contiguous Compressible Fluid Layer. (T)
D. E. Kheisin – 495 [584]
